I majored **Movie Image Design** and worked as a graphic designer for almost 2 years, where I learned to use several design tools. I also got introduced to **the world of IT** and later started to study about software development.

I would like to get more familiar with this industry and work in an atmosphere where I can feel **motivated**.

Keeping up my **professional development** is important for me, while I support my team using the **experiences and soft skills** I brought from my prior positions.
